

To whom it may concern,

At Caesarstone, minimizing our impact on the environment is a top managerial priority, involving all our employees and departments to assure our sustainability leadership.

We aim to create durable, low-maintenance products that support healthier environments and better use of material resources:

- Low Maintenance - Our surfaces require minimal maintenance and significantly reduce the need for sealants, cleaning materials and detergents.
- High Performance and Durability - Our quartz surfaces are long-lasting and durable, delivering both improved life cycle costs and additional investment value.
- Low-emitting Products - Caesarstone quartz surfaces meet stringent product emissions standards and have very little impact on indoor air quality. All Caesarstone quartz products are independently certified by the GREENGUARD Certification, which is part of UL Environment, a business unit of UL (Underwriters Laboratories), as low-emitting surfaces.

Caesarstone works with the leading sustainability organizations in the green building sector as part of its sustainability leadership. Our certifications for our manufacturing sites and products support our customers' needs for green and healthy building products and contribute to green building projects.

**ISO 14001** is the international standard for establishing an environmental management system to guide working towards: meeting environmental goals; monitoring compliance activities; investing in tools for enhancing a quality environment; employee and supplier training; health and safety procedures; and establishing efficient production processes.

All of Caesarstone's production plants have a certified Environmental Management System in accord with ISO 14001.
