Changing Room Locker

Laminex™ Panels for Partitions Oyster Grey

Versatile, practical and beautiful, Laminex™ Panels for Partitions are a structural, two-sided laminate that provides a broad variety of uses vertically creating endless possibilities for fixtures and furniture in commercial, institutional and hospitality settings.

Laminex™ Panels for Partitions range is perfect for design driven applications. The panel thickness is 13mm. Panels have a black core, that when machined, present a distinctive black edge that serves as a unique design feature.

Its inherent strength and durability is due to thermosetting resins, homogeneously reinforced with cellulose fibres and manufactured under high pressure and temperature. As such, panels are self-supporting, moisture resistant and durable. Laminex™ Panels for Partitions range is available in Standard grade, a multipurpose compact, and Laboratory grade, with a chemical resistant surface.

Where Can it be Used?

Applications

- Healthcare partitions: Hospitals, doctors surgeries, laboratory environments, laboratory furniture
- Commercial partitions: Office furniture, reception counters, interior wall cladding, cabinetry, benchtops, countertops, tabletops, lockers and seating
- Hospitality partitions: Lobby counters, bars, hotels
- Public and Leisure space partitions: Gymnasiums, schools, shopping centres, sanitary facilities, prisons, universities, libraries, educational furniture and decorative screens.

Why Antimicrobial?

More than ever people are looking for ways to fight the spread of germs with one of their biggest concerns being clean surfaces. Whether in the home or in public spaces such as hospitals, schools, sports clubs and shopping centres, Protec⁺ antimicrobial surfaces inhibit the growth of bacteria and fungi.

Lower levels of bacteria and fungi, not only means improved hygiene, it also means a reduction in staining, odours and premature degrading of materials.

Protec+ Antimicrobial Surfaces

Protec+ antimicrobial surface with a silver additive introduces an additional layer of hygienic protection.

- Innovative surface that inhibits the growth of bacteria and fungi.
- Independently tested for antibacterial and antifungal efficiency in accordance with ISO22196:2011, JIS Z2801 and ASTM G21.

How does it perform

Laminex[™] Panels for Partitions Standard range is backed by a 10 year limited warranty, and Laboratory Range is backed by a 5 year limited warranty so when durability and functionality are a premium, there's no better selection.

Workability

Standard tools for hardwood can be used for machining or processing such as sawing, drilling and routing. Neither the surface nor the sawn edges need to be protected or sealed. Panels will present a distinctive black edge.

Laminex™ Panels for Partitions

Laboratory — Benchtops —

Laminex™ Panels for Partitions Laboratory Range is the premium choice for vulnerable surfaces, with superior moisture, wear and chemical resistance properties.

Laboratory range is available in full sheet size 3670x1530mm.

Features and Benefits

- Can withstand temperatures up to 180°C for up to 20 minutes without loss of mechanical strength
- Tested with >90 aggressive reagents, including silver nitrate
- GREENGUARD Certified product that meets some of the world's most rigorous and comprehensive standards for low emissions of volatile organic compounds (VOCs)
- Non-porous and easy to clean
- Suitable for horizontal and vertical use
- 5 year warranty
- Group 3 fire rating

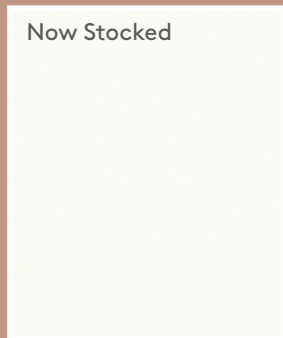

Applications

Ideal for counters, laboratory worktops, laboratory furniture, tabletops, partitioning, cabinets, and cabinet fronts.

Finish

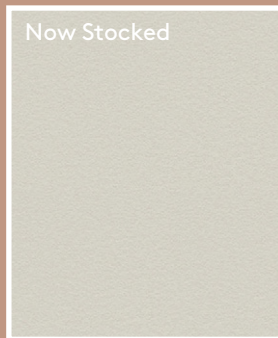

The carbide finish is smooth with a slight stipple effect.

The colours of the photographs and swatches depicted in this brochure are as close to the Laminex™ Panels for Partitions range as modern photographic, lighting and printing processes allow. The colour/finish combinations shown are available at the time of publication, but are subject to availability and may be withdrawn at any time. Laminex™ Panels for Partitions is no different from any other material in that darker colours and gloss finishes will always show scratches and superficial wear and tear more readily than lighter colours or lower gloss finishes. Such surfaces require more care and maintenance and Laminex New Zealand® recommends the use of laminate cleaning products (or mild household cleaning products). Please visit our website, laminex.co.nz, for specific care and cleaning information. Note that in certain lights or from different angles wipe down marks may be visible after cleaning. Laminex™ Panels for Partitions should be protected from strong direct sunlight as continuous exposure may cause discolouration or fading to the surface over time. Please obtain a copy of the terms and conditions of the Laminex™ Panels for Partitions 10 Year Limited Warranty from Laminex New Zealand® or visit laminex.co.nz. This warranty is in addition to any rights that may exist under the Consumer Guarantees Act (1993). J008820 06/20
